

Agricultural Limestone Columbia, CA

Agricultural Limestone is a safe, effective way to correct acidic soil conditions. It is recommended in many balanced soil fertility management programs.

Blue Mountain Minerals Agricultural Limestone

- Naturally high in Calcium to improve soil structure and aid in deeper root penetration.
- Tightly controlled particle size means rapid results for this season.
- Improves soil pH to a more balanced level helping to promote nutrient availability.
- High Oregon Lime Score due to CCE, Smaller Particle Size and Low Moisture.
